PO	Maximo Tolentino	Subject Officer	891112	Hispanic	28	Gun As Club - (F) Miscellaneous

Initial Complaint Narrative	
Complaint	On 01/01/2024, the complainant contacted the City of Chicago regarding a noise complaint at 1234 N. State St., Chicago, IL 60610. The complainant reported that the noise was coming from the rear of the property, specifically from a building that is currently under construction. The noise was described as loud, persistent, and disruptive to the complainant's daily life. The complainant stated that the noise was heard every day, from approximately 7:00 AM to 10:00 PM. The complainant also mentioned that the noise was particularly loud on weekends and during the night. The complainant requested that the City of Chicago take action to address the noise complaint and ensure that the noise levels are reduced to a reasonable level.
Investigation	The City of Chicago's Department of Public Works (DPW) received the complaint and assigned a case number. A DPW inspector was dispatched to the location of the complaint on 01/02/2024. The inspector conducted a visual inspection of the property and observed that the noise was indeed coming from the rear of the property, specifically from a building that is currently under construction. The inspector also observed that the noise was being emitted from a large piece of construction equipment, specifically a generator. The inspector spoke with the property owner, who stated that the generator was necessary for the construction work and that the noise was a result of the construction process. The property owner also mentioned that the noise was being emitted from the generator every day, from approximately 7:00 AM to 10:00 PM. The property owner requested that the City of Chicago take action to address the noise complaint and ensure that the noise levels are reduced to a reasonable level.
Resolution	The City of Chicago's Department of Public Works (DPW) issued a notice of violation to the property owner, stating that the noise levels were in violation of the City's noise ordinance. The notice required the property owner to take action to reduce the noise levels to a reasonable level. The property owner responded to the notice and stated that they would take action to reduce the noise levels. The property owner stated that they would move the generator to a different location, specifically to a location that is further away from the residential area. The property owner also stated that they would limit the use of the generator to only the times when it is absolutely necessary. The property owner also stated that they would ensure that the noise levels are reduced to a reasonable level. The City of Chicago's Department of Public Works (DPW) conducted a follow-up inspection on 01/03/2024 and observed that the noise levels had been reduced to a reasonable level. The DPW closed the case and the complaint was resolved.

STATES HE WAS ARRESTED AND CHARGED WITH § 87(2)(b)
